About this specimen

- A sealed disclosure of exhibits for a case or referral: an index, one page per exhibit with its hashes, continuity checks and redactions, a disclosure schedule and an integrity statement, exported with its manifest.
- The cover closes with a statement that the bundle does not assert admissibility, which is for the court to decide.
- A bundle that has not been released carries a NOT RELEASED watermark on every page.
- The export is a ZIP with a README, the manifest (JSON), the index and one file per exhibit.
- This specimen shows the report's structure only. It contains no client, case or collection data.
